

STELLA

DESCRIPTION

Stella is a dynamic pendant light that can be effortlessly expanded to a wide range of sizes from 10”(25.4 cm) to 59” (150cm) in diameter depending on user needs. Made up of multiple interwoven aluminum arm segments with strategically placed pivot joints, this dynamic fixture transforms from inward facing illumination to downward facing direct lighting when expanded outward. Stella’s highly versatile suspension system also allows for inverting the fixture to provide upward facing indirect lighting, all in a single fixture. Stella is offered in three matte painted finishes in graphite and sand. Its playful and highly interactive design invites a new kind of relationship with the light source. Ideally suited over table surfaces, entryway foyers, or in expansive chandelier groupings.

FIXTURE TYPE

Pendant
